

# Clevedon Beach

**Good bathing  
water quality**

## Synopsis

Clevedon Beach is on the Somerset coast overlooking the Bristol Channel. It is a sand and pebble beach, approximately 850 metres wide, backed by the promenade and the town. There is a marine lake at the beach which is filled by sea water on high tides.

## Pollution Risk Forecast

This bathing water is subject to short term pollution. Short term pollution is caused when heavy rainfall washes faecal material into the sea from livestock, sewage and urban drainage via rivers and streams. At this site the risk of encountering reduced water quality increases after rainfall and typically returns to normal after 1-3 days. The Environment Agency makes daily pollution risk forecasts based on rainfall
